EXPERIENCE

Lead Developer

TransUnion 🆅

📅 04/2024 - 07/2025   📍 Chennai, India

- Led an 8-member team across Rental Screening and API Marketplace projects, translating business needs into technical specs and ensuring on-time delivery
- Owned full-stack architecture across Angular, .NET Core, and Azure DevOps, ensuring seamless integration and performance.
- Delivered multi-region applications in Rental, Consumer, Commercial, Auto, and Insurance domains using .NET Core, Angular, and AWS
- Replaced manual deployments with automated CI/CD in Azure DevOps and upgraded apps to .NET 8, cutting release time by 60% and boosting reliability
- Oversaw B2B and D2C platforms in the US and South Africa, supporting 10M+ users with scalable, resilient systems
- Directed feature design, code reviews, and testing
- Partnered with QA, UX, and Product teams to deliver complex solutions on schedule, maintaining 100% sprint velocity
- Mentored junior developers and drove Agile practices across backlog grooming, sprint planning, and release coordination

Senior Developer / Developer

TransUnion 🆅

📅 10/2019 - 04/2024   📍 Chennai, India

- Built microservices-based full-stack solutions using .NET Core and Angular for enterprise platforms
- Developed responsive front-end interfaces and integrated data from MS SQL Server, PostgreSQL, and Oracle
- Streamlined deployments and testing via Azure DevOps and NUnit, improving release stability and reducing manual effort.
- Contributed to Agile ceremonies and collaborated cross-functionally to implement scalable features and optimize performance

Associate Software Engineer

Flextronics Technologies India Pvt. Ltd flex

📅 07/2016 - 10/2019   📍 Chennai, India

- Developed secure, scalable web apps for factory and finance domains using .NET Core and ASP.NET MVC
- Created responsive UIs with Angular, HTML5, CSS, Bootstrap, and jQuery
- Integrated backend systems with MS SQL Server and MySQL, improving query performance by 30%
- Collaborated with cross-functional teams to design, test, and deploy applications, contributing to 95% on-time delivery
